

Mission-Ready Data Quality

Defense & Intelligence Community Solutions

melissa

In defense and intelligence operations, data accuracy isn't optional—it's mission critical. Stale addresses, unverified identities, and outdated records introduce risk, delay decisions, and undermine readiness. Melissa delivers FedRAMP® authorized, secure data quality solutions that provide global address intelligence, precise location data, identity verification, legislative insights, and real-time monitoring. Trusted by federal agencies for over 40 years, our solutions integrate seamlessly into secure workflows to support mission success across the DoD and Intelligence Community.

Key Capabilities

Address Verification & Location Intelligence

- ✓ Global address verification, correction & standardization for 250+ countries with official postal authority data.
- ✓ Real-time autocomplete & predictive search - reduce data entry time up to 50% in portals, tax systems, & voter registration.
- ✓ Rooftop geocoding for precise location intelligence, geospatial analysis, routing, & mapping support.
- ✓ 48-month NCOA^{Link®} change-of-address processing (USPS Full-Service Provider) to keep records current & support Move Update compliance.

Reliable Identity Verification

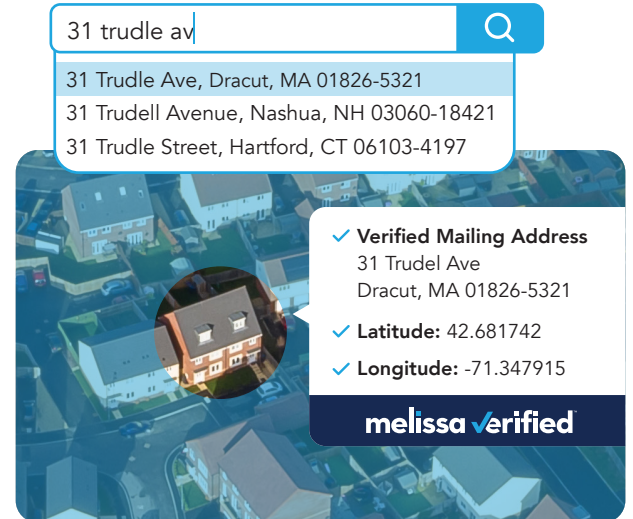

- ✓ Entity verification & identity resolution supporting high-stakes compliance & security requirements in defense environments.
- ✓ Fraud reduction & secure identity checks tailored for sensitive intelligence & operational applications.

Legislative & Official Data

- ✓ Authoritative legislative, regulatory, & official data sources to identify & engage key decision-makers.
- ✓ Track defense-related policy developments & support stakeholder engagement, influence mapping, & outreach strategies.

Real-Time Data Monitoring & Alerts

- ✓ Automated, proactive monitoring to detect & surface data quality issues before they impact mission operations.
- ✓ Real-time alerts & continuous updates to maintain accuracy & freshness across critical datasets with minimal manual effort.

✓ Multi-Source Match

Key Benefits For Defense & Intelligence Agencies

- ✓ Precise Location Intelligence – Enable superior analysis, logistics planning, targeting support, & emergency response with accurate geocodes & current addresses.
- ✓ Identity Assurance & Fraud Reduction – Strengthen security posture with verified identities & entity data in high-risk environments.
- ✓ Legislative Insights – Inform policy engagement, influence mapping, & decision-maker outreach with authoritative official data.
- ✓ Real-Time Freshness – Keep dynamic mission data current for responsive, informed actions in fast-moving operational environments.
- ✓ Reduced Costs & Waste – Cut undeliverable mail, returned items, manual corrections, & operational friction caused by bad data.
- ✓ Regulatory Compliance & Security – FedRAMP authorized, SOC 2 Type 2 audited, with seamless integrations for ArcGIS, Azure Data Factory, SSIS, & secure gov workflows.

Seamless With:

Strict Safeguards & Security

FedRAMP® authorization delivers a government-wide, standardized approach to security assessment, authorization, and continuous monitoring for cloud products and services. By achieving FedRAMP authorization, Melissa enables defense and intelligence agencies to confidently adopt our cloud-based address verification, identity intelligence, and real-time monitoring solutions while meeting rigorous security and compliance requirements. Our solutions feature no persistent PII storage in the cloud, 256-bit TLS encryption, and high-availability architecture designed for agencies where trust and data protection are non-negotiable.

Comprehensive Compliance & Certifications

- ✓ FedRAMP Authorized (Marketplace listing available)
- ✓ USPS CASS™/DPV®/NCOA Link® certified - Full-Service Provider Licensee & Developer
- ✓ 99.95% uptime SLA with high-availability architecture
- ✓ SOC 2 Type 2 audited
- ✓ 256-bit TLS encryption for data in transit; no persistent storage of PII in the cloud service
- ✓ CCPA & GDPR ready - built for agencies handling sensitive constituent & operational data

Trusted Across Federal Agencies

Defense, intelligence, and federal agencies rely on Melissa to maintain accurate, up-to-date constituent and operational data for mission-critical programs. Our solutions support voting systems, tax collection, benefits administration, emergency response, logistics, policy analysis, and public safety initiatives where precision and security are paramount.
