

# Global Phone Cloud Service

## A Real-Time Cloud Solution for Landline, VOIP, and Mobile Numbers

Data-fueled sales and marketing requires phone data that is verified and cleansed in real-time at point of collection before it can be used effectively.

Melissa Data's Global Phone Cloud Service provides you up-to-date results for phone numbers in over 240 countries and territories. The service will verify the entire phone number, what kind of phone the number is associated with (landline, VOIP, mobile), carrier details, determine what country the number is from, and provide detailed geographic information, and even indicate the predominant language spoken in that phone number's region.

For instance, for the number +49 3079788829, the service will verify it is a valid, callable number, identify the country as Germany, the predominant language as German, and the phone type as Landline .

## New! Mobile (HLR) Verification

Global Phone utilizes advanced HLR (Home Location Register) to verify and clean mobile numbers, ensuring a number is live and connected. Because it costs much less to perform an HLR look-up than it does to send an SMS, the service can save you both money and time, and is ideal for call centers, list owners, and websites that collect mobile numbers in real-time. Global Phone provides real-time checks for mobile phones in:

- |                         |               |                |
|-------------------------|---------------|----------------|
| - US and US Territories | - Sweden      | - Denmark      |
| - Canada                | - Spain       | - France       |
| - Germany               | - Luxembourg  | - South Africa |
| - Austria               | - Poland      | - Netherlands  |
| - Switzerland           | - India       |                |
| - Norway                | - Belgium     |                |
| - United Kingdom        | - Italy       |                |
| - Australia             | - Japan       |                |
| - Mexico                | - Korea       |                |
| - Columbia              | - Portugal    |                |
| - Chile                 | - Andorra     |                |
| - Finland               | - New Zealand |                |

## Benefits:

- Verify and correct phone numbers at point-of-entry to ensure you have valid contacts
- Identify bad numbers before you start calling
- Save money by identifying and verifying mobile numbers before sending an SMS
- Quickly route calls to employees fluent in a detected language

## Features:

- Verifies phone numbers for 240+ countries and territories
- Provides HLR lookups for mobile verification in many countries
- Determines the country-of-origin from international access codes
