

GovCloud™ Address Suite

FedRAMP® Authorized Global Address Verification with NCOA^{Link}® Processing

Verify global addresses and access change-of-address records for the U.S. with Melissa's GovCloud™ Address Suite, authorized by the Federal Risk and Authorization Management Program (FedRAMP®). With 40 years of data quality expertise, Melissa's proprietary engine is USPS®, CASS™ and DPV® Certified. We are also Canada Post SERP Certified, incorporating data from postal authorities like EIRCODE and Royal Mail to offer the best, most accurate address data essential for important government services like voting, public safety, tax collection, and more.

1 Address Verification

GovCloud™ Address Suite works in two ways: first, it verifies, corrects, and standardizes address data for over 240 countries and territories using postal standards. Address standardization supports postal formats worldwide and handles different language sets with the ability to transliterate non-Latin characters into Latin characters for easy validation and standardization. The second function is to return geographic area coordinates and datapoints to pinpoint the address.

2 NCOA^{Link}® Processing

Along with address verification, GovCloud™ Address Suite also provides an endpoint for the most current change-of-address services for U.S. addresses. This works by comparing company or individual/family names and addresses sent to the service against the USPS® NCOA^{Link}® database.

Features

- ✓ Verifies non-postal addresses, vacancies and moves
- ✓ Appends precise lat/longs for addresses and country-specific area hierarchies
- ✓ Detects and returns the moves for records that are up to 48 months old in the U.S.
- ✓ Returns addresses in mailing label format according to the standards of each country
- ✓ Appends additional information like unique identifier, delivery indicator, and more depending on the country

Benefits

- ⊕ Clean, standardized address data makes it easy to understand all the integrated activities for a client record
- ⊕ Reduce wasted time and expense associated with undeliverable mail
- ⊕ Improve the integrity of government services such as emergency response rates, tax collection, etc.
- ⊕ Comply with standards and reduce security risks across the agency

Strict Safeguards & Security

FedRAMP® is a government-wide program established to ensure the security of cloud services used by federal agencies and provides a standardized approach to assessing, authorizing, and continuously monitoring cloud products and services. By obtaining FedRAMP® authorization, Melissa ensures that our cloud services are compliant with rigorous security protocols, enabling us to serve federal agencies who require the highest level of data protection.

Melissa has 40 of experience in protecting and managing personally identifiable information (PII) and financial data. Because we know how important your data is, we are continuously undergoing independent audits and meet many cloud, industry, and postal compliance efforts that include:

- ✓ SOC2 Type2
- ✓ HIPAA/HITECH/HITRUST
- ✓ USPS® yearly audit to host NCOALink® database

Along with these security features, GovCloud™ Address Suite uses 256-bit TLS encryption to protect personally identifiable information during transmission, so your data stays as safe as possible.

Keep your data clean, detect fraud, and protect your client data with the most reliable solutions available. Contact us now at fedramp@melissa.com or visit our website for a free quote.

Please Note:

**NCOALink® files updated weekly. Melissa is a non-exclusive NCOALink® Full Service Provider Licensee of USPS®. Melissa is also an NCOALink® developer. The following trademarks are owned by the United States Postal Service®: USPS®; DPV®; NCOALink®; CASS™.*

About Melissa

Since 1985, Melissa has specialized in global intelligence solutions to help organizations unlock accurate data for a more compelling customer view. More than 10,000 clients worldwide in areas such as retail, education, healthcare, insurance, finance, and government, rely on Melissa data quality and ID verification software, including data matching, validation, and enhancement services to gain critical insight and drive meaningful customer relationships.
