melissa

2025 CATALOGUE

THE ADDRESS EXPERTS

40 Years of Address Expertise

World Class Address & Identity Verification for KYC/AML, Ecommerce, BI & Marketing

USPS, SOC 2 & GDPR Certified Services

Coverage for 240+ Countries & Territories

On-Prem, Cloud, SaaS, Batch, Single Address

Award Winning Support

120-Day ROI Guarantee

Thank you for downloading Melissa's 2025 Catalog. For Melissa, 2024 was a remarkable year. We expanded the availability of our data, data services and applications to a number of marketplaces including FedRAMP, Snowflake, Microsoft AppSource and Google Workspace, and launched new integrations for ESRI, Stripe and Shopify to name a few. Now clients have even more opportunities to discover, evaluate and use our CASS and SERP-certified address verification, autocomplete and standardization tools to innovate their business. Whether you need a SaaS, Web API, or on-premise deployment – we've got you covered with solutions that are lightning fast, fully documented and fit for any operational environment and vision.

And we've continued our global expansion. Our new offices in Mexico and Brazil mean that Melissa services clients on 5 continents with the real-time and bulk verification capabilities – including global address, phone, email and identity verification – needed to handle the myriad challenges and complexities of international customer data.

We celebrate our 40th anniversary this year, and we couldn't have done it without the support of more than 10,000 customers all around the world.

Your Partner in Data Quality,

Ray Melissa, CEO

Recent Acquisitions

ZipInfo.com®

ZipInfo is a longtime provider of ZIP Code data to many companies. With this new product line, we offer a broad range of ZIP Code solutions that can help you with any and all of your ZIP Code needs, from county-ZIP Code files to MSA databases.

Global-Z

Global-Z has been a long-time leader in contact data quality, bringing their expertise to some of the biggest brands in the world. Now, Melissa is pleased to offer a more personal, hands-on approach to data cleansing, working with you on any project you may have.

CICERO

Cicero is the leader in elected official information & geographic data on elections. With this acquisition, Melissa is excited to now provide comprehensive government official information on an address-to-district level for the most accuracy.

New Integrations

Melissa for FedRAMP Marketplace

Melissa for Esri ArcGIS

Melissa for Google Sheets

melissa

WE ARE THE ▲DDRESS EXPERTS

Since 1985, Melissa has been a leader in address and data quality solutions, and with 40 years of experience, we know our way around the address. We are USPS® CASS™, PAVE™, NCOALink®, and Canada Post SERP® certified, and have partnered with many other international postal agencies to offer the best, most accurate data. Our proprietary engine is constantly being fine-tuned to deliver exactly what our customers need, when they need it.

Melissa offers:

Global Coverage: UK, U.S., Canada and 240+ countries & territories

Flexible Technology: Cloud, on-premise, SaaS, bulk data processing, or single lookup

Unbeatable Uptime: 99.9% API uptime guarantee

Lightning-Fast Processing: We return an address in under 20 ms

Enterprise Readiness: We process 32 billion addresses per year for our customers

Flexible Pricing: Single address and web dev credits or volume discounts

No-Risk: Free trials, proof of concept + 120 day ROI guarantee

Compliance: GDPR, HIPAA, SOC2, and FedRAMP® certified to ensure privacy and security

Developer Portal

Build, Test & Play in Our Sandbox

Learn and play with our tools in our Developer Portal. You'll get instant access to our contact data cleansing, identity verification, enrichments, property data and geolocation APIs. It's a great way to do rapid application testing or easily integrate into your e-commerce website or mobile apps. You can activate 1,000 Developer Portal credits a month with easy, on-demand refills.

KEY FEATURES

- Single record lookups ideal for web forms and call centre applications

- Get started immediately with a Melissa Account and 1,000 credits

- Modern interfaces available; REST, JSON, and XML for easy integration into your applications

CLOUD APIs

Build comprehensive global address, email, name and phone verification into your websites plus enrich records with detailed property, firmographic and location intelligence. You can even combine the output of several APIs with your own data to generate customer mashups, maps, shapes and firmographics that empower new products.

Global Address: Correct, verify and standardise global addresses. All results are given in their proper country-specific mailing format

Global IP Locator: Find the location of global IP addresses and identify TOR endpoints and proxies

U.S. Property Service: Receive comprehensive property and mortgage information on over 140 million U.S. properties

Global Email: Correct, verify and determine the deliverability of global email addresses

Global Name: Validate and parse ethnically diverse first and last names

Global Phone: Verify a global phone number's activation status, output Caller ID info, line type, geographic details, dominant language, and carrier

Personator: Determine if the contact data points for a customer belong together, as well as scrub and verify U.S. and Canadian contact data and update movers in your system

Global Business: Get detailed firmographics on businesses including standardised company name, job titles, contact information, etc.

SSN Name Match: Verify a Social Security Number against a first and last name to determine validity - includes flags for deceased records

ON-PREMISE APIs

We also have a suite of on-premise APIs that work with Windows®, Linux®, Mac, AIX, and can be used with any programming language like C#, Java, Python, C/C++, etc.

Global Address Verification API

Verify, Correct & Standardise UK, U.S. & International Addresses

Address data can be tricky. There are spelling mistakes, wrong house numbers, incorrect postal codes and formatting errors that don't conform to a country's specific postal regulations. This can be a costly concern for companies shipping across borders. Enter Melissa's Global Address Verification.

Global Address takes in any global address in one line or multiple lines, and matches it against the best postal reference sources (246 countries and territories) to correct, verify and standardise the submitted address.

Global Address then returns the deliverability status, as well as its country specific mailing format to ensure that the address information is captured correctly and that mail and shipments arrive on time.

1. Input Record

Address:
Giessener 30 Frankfurt am Main 60435 DE

2. Global Address Verification

✔ Parse   ✔ Format
✔ Standardize   ✔ Geocode
✔ Verify

3. Output Record

Address Line 1: Gießener Str 30
Address Line 2: 60435 Frankfurt Am Main
Country: Germany
Latitude: 50.140164°
Longitude: 8.693925°

REQUEST A PRODUCT DEMO OR PROOF OF CONCEPT (POC): www.melissa.com/mc-address

60% OF CONSUMERS INTENTIONALLY PROVIDE INCORRECT INFORMATION WHEN SUBMITTING PERSONAL DETAILS ONLINE
Source: Marketing Week

KEY FEATURES

- Partners with Premier Postal Agencies like USPS, Canada Post, Royal Mail, Australia Post, LaPoste and more.*

- Correct, standardise international addresses to local country formats

- Transliterate many popular native character sets into Latin

- Returns precise lat/long coordinates at the rooftop level

*Complete list of official Melissa Postal Partners:
www.melissa.com/uk/company/partners#postal-partners

Our transliteration engine supports over 40 different languages and writing systems including:

o Cyrillic (Russia)

o Hellenic (Greece)

o Hebrew (Israel)

o Arabic (United Arab Emirates)

o Kanji (Japan)

o Simplified Chinese (China)

o Hangul (South Korea)

o Thai (Thailand)

ADDRESS VERIFICATION FOR GOVERNMENT AGENCIES

Federal agencies can also experience the power of high-quality data to elevate services like voting, public safety, tax collection, and more. GovCloud Address Suite is a cloud-based service that verifies, corrects and standardises global address data and provides change-of-address processing for U.S. addresses. GovCloud Address Suite meets FedRAMP® security requirements.

Express Entry

Autocomplete Addresses to Ensure Accuracy & Increase Conversions

80% of online carts are abandoned due to a complicated checkout process. Make it easy for customers to buy with Global Express Entry.

Add Global Express Entry to power your web forms and CRM with type-ahead address autocompletion and say goodbye to incorrectly addressed mail, location errors like inaccurate Postcodes, and even typos.

Global Express Entry suggests a complete, verified postal address saving up to 50% in data entry time and simplifying checkout.

Customers will spend less time filling out forms and more time buying, while you benefit from increased conversions and better quality contact data for fulfillment.

ECOMMERCE EXPERIENCED 10 YEARS OF GROWTH IN 3 MONTHS DURING THE PANDEMIC
Source: McKinsey

KEY FEATURES

- Autocompletes addresses to speed up order entry with reduced keystrokes

- Provides real-time verification to eliminate shipping costs due to incorrect addresses

- Autofills all address fields (city, county, Postcode, etc.); works like an Internet search engine to upgrade the user experience

- Available as a Cloud API or Desktop Software

- Location-based filtering available to return only addresses within a specific range of a lat/long point

- Rooftop Geocoding available for select countries

Global Email API

Verify Email Addresses with Real-Time Email Mailbox Checking

Experiencing high bounce rates? Try our Global Email Verification. Verify email addresses and remove up to 98% of bad emails to increase deliverability and avoid high bounce rates that lead to blacklisting and hurt your valuable sender reputation.

TWO VERSIONS OF GLOBAL EMAIL

Premium
Provides real-time email mailbox checking including domain-specific logic, SMTP commands and other proprietary mechanisms to validate inboxes are live.

Express
Offers higher speeds and performance using a cached mailbox level validation database of known good and bad emails.
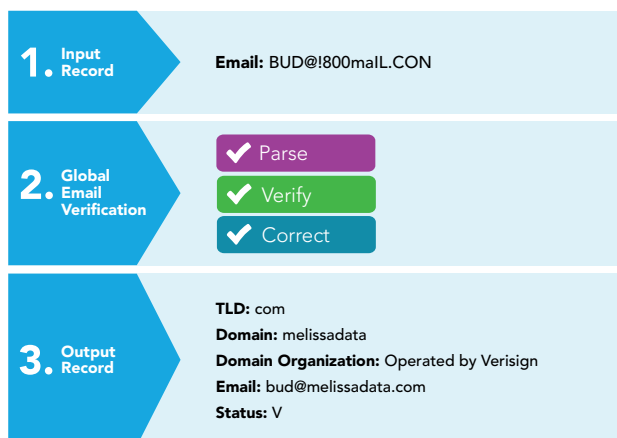

ONE THIRD OF CUSTOMERS HAVE GIVEN OUT A FAKE EMAIL ADDRESS
Source: Marketing Week

KEY FEATURES

- Pings each email to ensure it is active and can receive mail

- Corrects typos and illegal characters (yaho.com, !gmail.con, etc.)

- Provides FCC mobile domain detection for CAN-SPAM compliance

- Includes Whois registration details for free (registrant, creation date, domain age and more)

- Deliverability Confidence Score to dynamically predict the probability of mail being successfully received by the recipient based on additional factors

1. Input Record
Email: BUD@!800maIL.CON

2. Global Email Verification
✔ Parse
✔ Verify
✔ Correct

3. Output Record

Email: bud@melissadata.com
Status: V

EMAIL CHANGE OF ADDRESS SERVICE (ECOA)

Our ECOA service matches your list of bad/bounced emails against a database of hundreds of millions of email change-of-address records to identify outdated emails, and then replace them with the new ones. Once a new deliverable email is identified, we send a permission-based email to the recipient. You're left with clean, updated emails that increase response and help you re-engage with lost customers.

REQUEST A PRODUCT DEMO OR PROOF OF CONCEPT (POC): www.melissa.com/mc-email

Global Phone API

Ensure UK & International Mobile & Landline Numbers are Valid & Callable

With only a phone number and/or a country entered, our Global Phone Verification can determine whether the phone number is valid for the region, plus identify the country of origin from the international access code.

The solution can verify phone numbers for 240+ countries and verifies phone number types (landline and mobile identifiers available in U.S. and Canada only), as well as carrier. We even establish the most common language in use for the area.

Premium Phone Verification

The Premium Phone Verification feature determines whether a mobile number is live and connected. This is an ideal service to keep your mobile database clean and updated, and helps reduce wasting money on SMS texts that will never go through due to wrong or invalid numbers. Ideal for call centres and websites that collect mobile numbers in real time, Premium Phone supports many countries, including the U.S., Canada, Germany, the UK, Mexico, Spain, India, Japan, Korea and more.

Global CallerID Data

Another cool feature the solution offers is Global CallerID. It taps into real-time carrier data to return the name of a person or business associated with the number at activation. The feature helps you provide more personalised and relevant messages to customers for greater marketing effectiveness.

REQUEST A PRODUCT DEMO OR PROOF OF CONCEPT (POC): www.melissa.com/mc-phone

65% OF FORTUNE 500 COMPANIES SAY PHONE CALLS ARE THEIR HIGHEST QUALITY LEAD SOURCE
Source: Grasshopper

KEY FEATURES

- Verify and correct phone numbers at point of entry or in batch
- Ensure mobile numbers are live and callable in real time
- Confirm if numbers are mobile for compliance
- Identify the person or business associated with a mobile number at activation
- Return carrier and geographic information including latitude, longitude, country of origin and predominant language

1. Input Record

Phone: +44 20 7323 8299

2. Global Phone Verification

✔ Parse
✔ Verify
✔ Geocode

3. Output Record

Subscriber Number: 73238299
Domain: 20
Status: London, City of
Country Name: UNITED KINGDOM
Language: English
Latitude: 51.500152°
Longitude: -0.1262360000000085°

Global Phone Verification validates that a phone number is callable and identifies its type - landline, mobile; offers carrier details; and then determines country of origin (with an accuracy rate of 90% for the U.S.).

Geocoding/Street Route API

"X Marks the Spot" Global Location Accuracy

Do you know where your customers live? Melissa's GeoCoder unlocks precise rooftop latitude and longitude coordinates of UK and international addresses, plus is enrichable with a wealth of location intelligence.

Geocoding is ideal for:

• Powering store locators, dealer locators and local search lookups

• Mapping customers or sales territory clusters

• Gathering business intelligence used for market analysis

• Targeted marketing campaigns

• Improving logistics to decrease shipping costs

• Real-time fraud detection
Melissa Tip:

For more precise results, start with Global Address Verification to fix spelling errors and complete addresses with missing or invalid components.

Reverse Geocoding

ReverseGeo takes a lat/long coordinate and returns the closest single or list of addresses. You can find what address this coordinate is on or closest to. We recently introduced a new dealer locator functionality that allows users to input a list of "stores" and ReverseGeo will find the closest one. Currently available for the U.S.

REQUEST A PRODUCT DEMO OR PROOF OF CONCEPT (POC): **www.melissa.com/mc-geo**

"We've experienced significant improvement to rooftop accuracy. Because it is housed on our servers, reliability has improved and latency issues have been virtually eliminated."
– Jon Bohnert, Symmetry Software Executive Vice President

KEY FEATURES

• Precise rooftop geocodes for 95% of all physical UK addresses

• Postcode level geocoding also available to show geographic area and city boundaries

• Premise-level data for 120 countries worldwide, including rooftop

MELISSA STREET ROUTE

Street Route is an easy-to-use developer's tool that returns the distance (in miles or kilometers) and the total driving travel time between two locations. The solution will also determine geolocations that can't be reached by vehicle travel. Examples are geopoints to islands or rural off-road residences.

Street Route is ideal for:

• Hospitals or healthcare providers looking to calculate distance from nearest health centre to a residence

• Helping those determine distance to nearest emergency shelter

• Restaurant or store locators

Personator Identity

Global KYC & AML Check

Melissa's Global KYC & AML Check in Personator Identity is designed for organisations that need high-quality, real-time electronic identity verification (eIDV). It's delivered using a layered approach of data quality checks. Each has a dedicated engine that corrects, parses and understands names and addresses, empowering you to safely onboard new customers while protecting your organisation.

EIDV CAPABILITIES:

3. Contact Data Verification

2. Proof of Address

1. eIDV, 2+2 & Mobile Doc Scan

0. Sanction, PEP & Deceased Screening

Verify Each Piece of the Identity Puzzle

CONTACT DATA VERIFICATION

The first step to identity resolution: contact data verification. Melissa is the only eIDV service that employs a data quality verification layer that verifies each piece of the identity puzzle before it gets passed to the next step. Verify global addresses, emails, phones & recognise millions of unique-to-culture last names and first names.

A Quick Check Enhances Fraud Prevention

PROOF OF ADDRESS

Once contact elements are verified, ensure the person actually lives at the provided address. Leverage 2.1 billion records to perform a proof-of-address check. It's a light-weight, quick check that goes a long way to providing enhanced fraud prevention & is available in select countries including U.S., UK, Germany & many others.

Melissa ID

REDUCE RISK, ENSURE COMPLIANCE & KEEP CUSTOMERS HAPPY

Verify that documents aren't forged or tampered with while allowing customers to securely submit identity information at any time. It features biometric facial recognition, advanced document type recognition & governance via the document onboarding portal. Plus, the Business Portal streamlines workflows for businesses to review & approve submissions with ease.

eIDV: Perform full eIDV by verifying SSN, national ID & date of birth to prevent underage or consumer-not-present activities.

2+2: A more advanced mode of eIDV uses 2 different sources to corroborate & verify 2 pieces of information. Check a person's ID against relevant sources like electoral rolls or credit & court data.

ID Check

Identify document type and populate data into relevant systems.
Biometrics Check

Recognise a match between a selfie and an ID image.
Liveness Check

Determine liveness vs. a static image.

Compliance Reporting

Customer due diligence reports & full audit trails generated and stored.

Gain Confidence in an Individual or Entity

Gain the greatest confidence in an individual or entity after they have been screened through sanctions lists, Politically Exposed Persons, & other federal & international restricted party watchlists, including a Negative News Screening. All reference data which a user is screened against is refreshed daily in our real-time environments.

Know Your Business

Match businesses, addresses, and business IDs worldwide to ensure legitimacy in B2B relationships. Includes the verification of a business name, country-specific ID, status, type and registration date.

Watchlists & Sanctions List Screening

Politically Exposed Persons (PEP) Coverage for over 200 countries and territories.

Negative News Check

Scans international media sources for negative or unfavorable news about an individual or business – providing titles, links and dates of news coverage.

REQUEST A PRODUCT DEMO OR PROOF OF CONCEPT (POC): www.melissa.com/mc-compliance

Personator Consumer

U.S. & Canada Consumer Check

Fill in the gaps in your customer and business contact records with U.S. and Canada Consumer Check powered by Personator Consumer. We combine billions of active and historical records to verify consumer contact information and enrich your data with demographic, firmographic and geolocation information to build a clearer view of your customers for deeper insights.

U.S. and Canada Consumer Check by Personator easily integrates into applications, shopping carts and forms to ensure you capture accurate name, address, email and phone data for rapid onboarding, timely fulfillment and fraud prevention.

PERSONATOR CONSUMER VERIFICATION CAPABILITIES

Address, Name, Phone & Email Check

Verify, correct and standardise U.S. and Canadian contact data – addresses, names, phone numbers and email addresses.

- Standardise full names, set salutations, genderize and parse records

- Update the addresses of U.S. and Canadian customers/prospects with 10+ years of history and millions of move records

- Correct and update email addresses, domains and formatting

- Update and properly format mobile and landline phone numbers

- Certify that U.S. and Canadian address records are accurate and deliverable

- Aggressively correct and append house numbers, cities, states, ZIP Codes to U.S. addresses with Advanced Address Correction (AAC)

Real-Time Name-to-Address Check

Verify customer identities fast by instantly matching names to addresses as they are entered during customer onboarding and during checkout to identify potential fraud immediately. Prevent bad data from entering your systems, reduce fraudulent transactions and keep your database clean with real-time address, email, phone and name validation.
PERSONATOR CONSUMER ENRICHMENT CAPABILITIES

Data Appends

Add missing addresses, names, phone numbers and email addresses. These enrichments not only improve communication and omnichannel marketing efforts, but they also help you match missing contact fields to flesh out your single view of the customer.

Geocoding

Convert U.S. and Canadian postal addresses to a precise rooftop latitude and longitude coordinate in real time for mapping, logistics, location analysis, target marketing and more. Power retail store location and local search lookups to increase customer satisfaction and ease of shopping. The business uses are endless.

Consumer Demographics

Add detailed demographic information on over 250 million U.S. individuals and 170 million households, including household income, marital status, credit information and more.

- Date of Birth
- Deceased Information
- Gender
- Presence of Children
- Number of Adults

PLATFORM ARCHITECTURE AND TOPOLOGY

SIMPLE VISUAL INTERFACE	Schedule jobs & create & manage access & routines.
SECURE DATA PROCESSING	On-premise data management with user authentication to meet compliance & security.
COMPATIBILITY	Supports flat files/CSV, Microsoft SQL Server, MySQL & Oracle.

FAST DISTRIBUTED PERFORMANCE	Processing 50+ million records per hour to handle large data sets at light speed.
IMPLEMENTATION	Downloads/installs without programming; hosted cloud-based solution available.
CUSTOMISATION	Configurable interface & customisable user rights management to meet your needs.

REQUEST A PRODUCT DEMO OR PROOF OF CONCEPT (POC): **www.melissa.com/mc-unison**
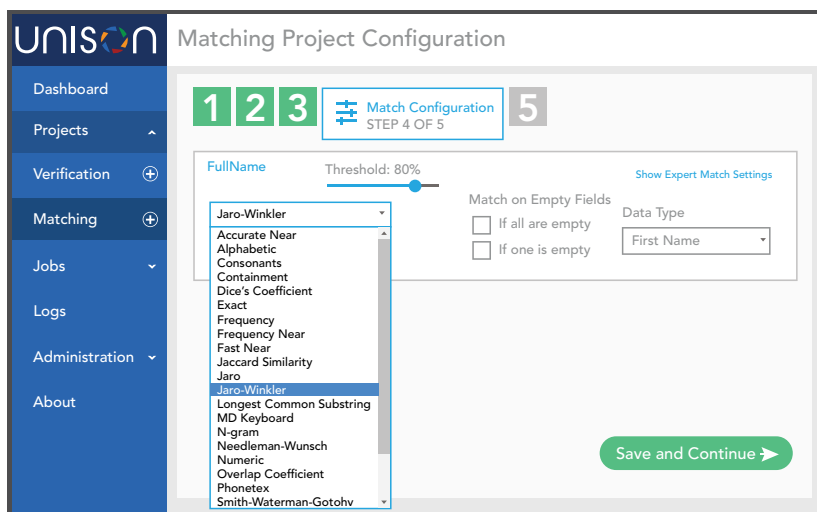

AI-POWERED MATCHING GUI

Ensure a reliable single customer view with advanced fuzzy matching algorithms and golden record survivorship straight in Unison. It features a wizard-based matching interface, fuzzy matching score and robust reporting. Specialised AI determines the best approach to meet your unique deduping needs; plus, review and tweak results straight in the platform, in real time.

DATA PROFILING

Produce a wide array of profiling metadata with visual reports such as: overall data quality, Unique/Distinct, Duplicates, Lengths, Empty/Null, Profanities, Value, and RegEx Patterns, etc. The profiling feature offers the ability to drill down into the different metadata reports to review affected records and export them as needed. Instantly gain important and critical insight on data, identifying possible problems and other irregularities that may require further attention.
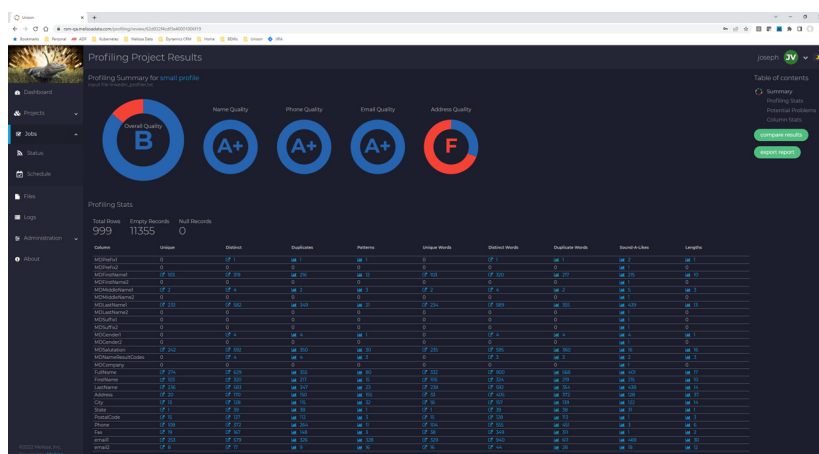

The Vault Powered by Unison

The Vault is a cloud data warehouse that allows users to safely upload their data for on-demand or scheduled processing including cleansing, verification, and standardisation. Once the data is processed, the easy-to-use interface allows users to quickly preview their data and download it with minimal training required.

Global Address Database (GAD)

Fill in the Gaps in Your Master Address File

If your master address file isn't complete, it's time to meet GAD – the Global Address Database. It provides complete postal address information and location intelligence (rooftop lat/long coordinates, census tract/block number, county name with FIPS code) for the U.S., Canada and a growing number of countries like France, Germany, Spain and more.

With GAD, your address file will be complete, standardised and always up to date. GAD provides you with a complete list of all addresses in your target area for optimised route planning, logistics, resource allocation and GIS applications.

Similar to a barcode or ISBN, each address in the GAD is assigned a unique 10-digit Melissa Address Key (MAK). Each unique key identifies a discrete physical address and aligns a multitude of additional information for insight.

MAK IS ONE OF A KIND

MAKs never change – so detailed information that might change over time (street addresses, lat/long, Census, county or FIPS code data) is updated regularly and always accurate. This helps you easily keep your address data up to date and accurate.

GAD SUPPORTS THE FOLLOWING ADDRESSES
USA

- 200+ Million U.S. Addresses (includes USPS, non-USPS, PO Boxes, Apartments & Suites)

WESTERN EUROPE

- 25 Million French Addresses
- 15 Million German Addresses
- 26 Million Italian Addresses

CANADA

- 13.6 Million Canadian Addresses

APAC

- Republic of Korea
- Hong Kong
- Singapore
- India
- Pakistan
- Vietnam
- Australia
- New Zealand

UPDATED COUNTRY LIST AND ADDRESS TOTALS FOR EACH COUNTRY AVAILABLE ON OUR WIKI PAGE: www.melissa.com/mc-gad-wiki

SEARCH YOUR WAY

GAD allows you to "keyring" groups of MAKs. It's a great way to find all of the existing addresses in a specific area, for instance, in a school district, congressional district, ZIP Code (or group of ZIP Codes), city, state, or any shape-based search like a radius or polygon. Select the search parameters to fit your needs.

- Optimise route planning and reduce response times for first responders

- Improve utilities management like waste collection and water allocation

- Get accurate analysis for risk management, route planning and sales intelligence
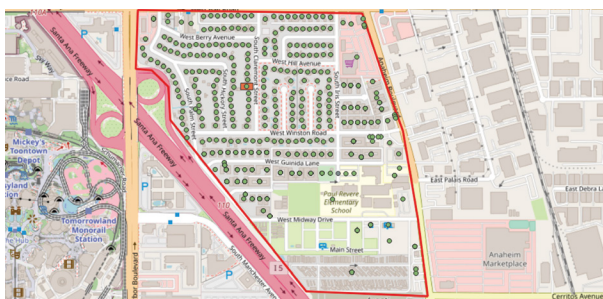

All the Addresses in a Neighborhood Map
All the Addresses in a Radius

WHY CHOOSE GAD?

GAD provides complete coverage and complete intelligence, on all valid addresses within a given area – residences, businesses, apartments, suites and PO Boxes – with fully customisable online ordering.

Fill the gaps in your records and build a more complete customer picture so you can:

- ✅ **Gain Insight**
- ✅ **Empower Omnichannel Marketing**
- ✅ **Boost ROI**

POPULAR SERVICES

Premium Email Append (Consumer + Business)

Connect with customers more efficiently and empower email marketing campaigns by adding loads of accurate email addresses to your customer records.

- Matched against our constantly updated database of 350 million email addresses
- Industry-high append rate of 25-50%
- Free Email Append Test: Send us your file and find out how many emails we can add!

Consumer Demographic Append

Add 100s of data elements to your consumer records including household income, age, gender, presence of children, marital status and more.

Email Verification + ECOA

Ensure emails get delivered and your sender reputation remains stellar. Our Email Verification and Email Change of Address (ECOA) services clean your list of more than 95% of bad addresses and replace old, unused email addresses with the new ones your customers are actively using.

Premium Phone/Mobile Append

Reengage lost customers or nudge prospects along the buying process with a phone call. Add accurate mobile and landline phone numbers to your records for effective telemarketing and SMS marketing.

- Matched against our daily updated database of 170 million numbers (landline only)
- Industry-high append rate of up to 40%
- Scrubbed against Do-Not-Call registry for compliance

Property Append (U.S. Only)

Add 165 property and mortgage details including building and lot, current sale, deed and more on over 140 million U.S. properties.

Business Firmographic Append

Choose from 30+ firmographic elements including contact name, sales volume range, employee size, SIC/NAICS code and more to augment your B2B sales and marketing efforts.
